

TotalShredder™ USB

New shredding technology with a self-bootable USB
Are you exposing sensitive data when you donate,
recycle or sell your PC?

TotalShredder™ USB

New shredding technology with a self-bootable USB
Are you exposing sensitive data when you donate, recycle
or sell your PC?

Compliant to military US DoD 5220.22-M clearing standard, securely delete all data on hard drive from a unique TotalShredder™ USB key. When you delete a file, traces still remain on your hard drive. Remove financial data, confidential emails, and other sensitive files completely!

NOTE: The device requires that your motherboard has the ability to boot from USB. Please contact with your motherboard manufacturer for more information.
