

## Product Overview:

DriveClone System Recovery provides mass duplication solutions for system builders and PC manufacturers.

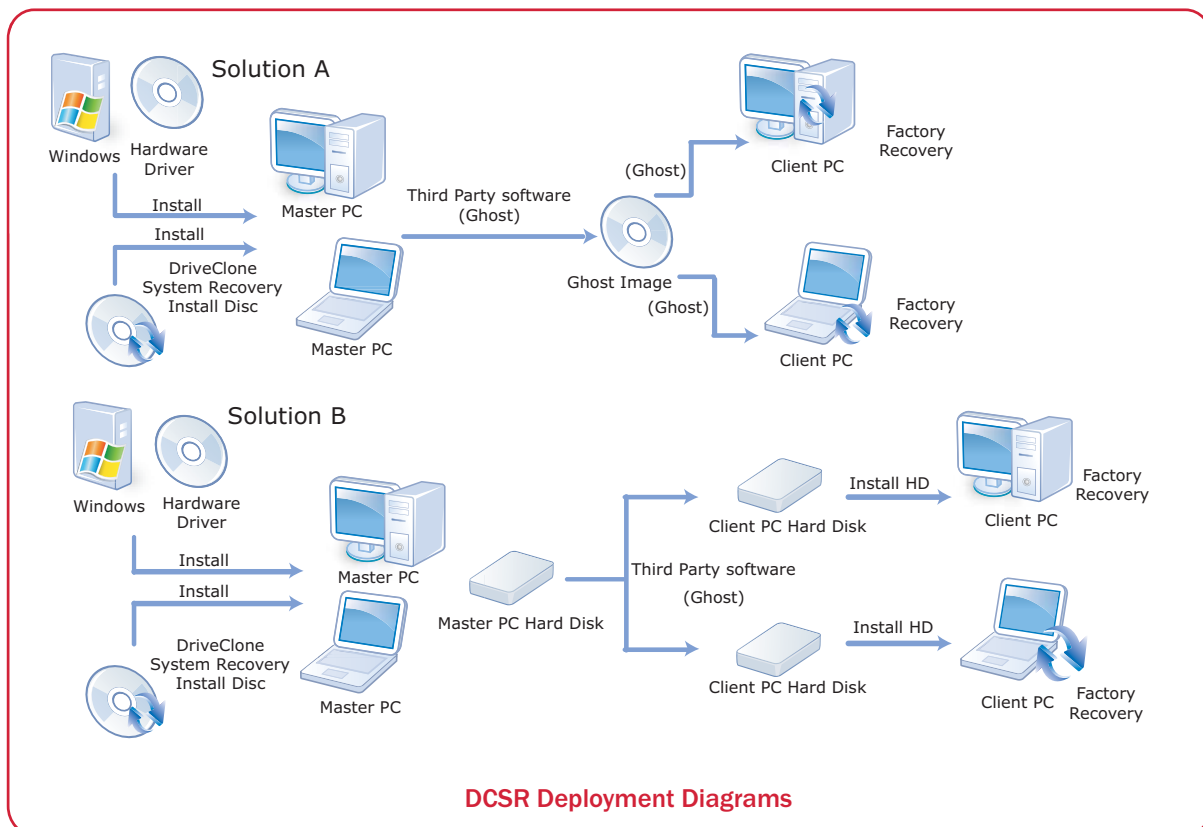

With DriveClone System Recovery, system builders can save an entire system, including the operating system, drivers, third party applications in a hidden partition for restoration to original factory settings. Users can restore their systems to an original factory configuration with the simple touch of a hotkey, or alternatively, using a Recovery CD/DVD.

### Using DCSR as a system builder is as simple as 1-2-3

1. Create a Master PC: Install Windows Vista, all necessary drivers, and all applications.
2. Install DCSR: DCSR will create a protected hidden partition during installation. DCSR will then store the Master PC backup image in the hidden partition.
3. Mass production: Duplicate the Master PC image to multiple new PCs.

## Key Features

- Master PC Configuration
  - Silent Install
  - Reboot Prompt
  - Customizable Hot Keys
  - Customizable Compression
  - Customizable Hidden Partition Size
  - System Partition Backup
  - Real-time Windows Backup
  - Factory Backup Image
  - Recovery Disc Burning
- Restore to Factory Settings
  - Factory Backup Image Recovery
  - Recover from Hidden Partition
  - Recover from Recovery Disc
  - Hotkey Loading Recovery Environment
  - Graphic User Interface in Windows OS
- Easy to use Wizard UI design
