

Total Backup Recovery™ 7

Total Backup Recovery Home is all you need to totally protect your computers from a disaster. Total Backup Recovery Home assures that photos, music, documents and everything you care most about are well protected and can be easily recovered. Total Backup Recovery Home offers comprehensive backup & recovery, including file and folder backup, complete system and incremental image backup. Set your PC backup schedule, and Total Backup Recovery Home automatically backs up your data without disrupting any work in progress.

System Requirements

Operating System Supported

- Windows 7 (32 & 64-bit)
- Windows Vista (32 & 64-bit)
- Windows XP (32 & 64-bit)

Backup Destination Storage Supported

- Internal Hard Drive, External USB Hard Drive, USB Flash, SSD (Solid State Drive), Firewire (IEEE 1394) Device
- Network Share Folder, Network Drive, NAS (Network Attached Storage), iSCSI, and iPSAN Storage
- RAID 0/1/5/10/JBOD Disk Array
- CDR/RW and DVD+-R/RW
- FTP Offsite Backup

Main Features:

Full Image Backup & Universal Restore

Full backup (disk imaging) or back up only selected files & folders

Open File Backup

Migrate to a bigger drive or Windows 7 with a few clicks

FileRescue-911™ capability

Total Backup Recovery includes a powerful file rescue utility allowing you to boot into a crashed system using its built-in pre-operating system in order to retrieve your precious files from a non-operational drive.

Features & Benefits

Total Backup Recovery™ 7 Home

Total Backup Recovery Home is designed for home users to effectively protect their laptops and computers from disaster with the easy to use user interface. With Total Backup Recovery, you'll find a total solution to resolve all of your backup and recovery pain points.

Open file backup

Back up open files while their applications (ex. Outlook) are still running, and ensure consistent backups.

Max Speed with SSD (Solid State Drive)!

Total Backup Recovery clones (moves) your hard drive to SSD drive in minutes (vs spending hours or weeks reinstallation everything).

Intelligent schedule

Automatically run scheduled full or incremental backups. Allows you to perform "set it and forget it" unattended backups on all workstations and servers.

Migrate & Upgrade Easily

It takes only minutes for Total Backup Recovery to completely move everything - including all files, photos, music, application settings and your operating system - to your newly purchased computer or hard drive.

Google Desktop search incorporated - Makes data recovery as easy as searching the web with Google.

Allows you to use the Google Desktop search utility for searches of a user's e-mails, computer files, music, photos, chats, web pages viewed, and other "Google Gadgets" in Total Backup Recovery backup images.

Email Notification

Notify administrator with all backup and restore related activities and results via email.

Advanced script (Pre and Post Command) function

Execute pre-defined commands (scripts) prior to or after a scheduled backup taking place. Highly useful for complicated disaster recovery requirements

FileRescue-911™ capability

Total Backup Recovery includes a powerful file rescue utility allowing you to boot into a crashed system using its built-in pre-operating system in order to retrieve your precious files from a non-operational drive.

Backup Anywhere

Backup to a local hard drive, USB drive, network share, CD/DVD, NAS, iSCSI, or remote FTP server with a friendly user interface providing a "set it and forget it" unattended backup. Backup your Windows 7 system

Built-in VMware™ P2V and V2P support

You can backup a VMware host machine in an image or convert a Total Backup Recovery image file to a VMware image file format (VMDK) to run it on a virtual machine.

Quota Management! - No more "Disk Is Full" error messages!

Create and enforce quota limits for the storage usage of each workstation. Total Backup Recovery will reuse the oldest backup space for new backup automatically.

Crashed System Restore with Bare Metal Recovery

With Total Backup Recovery, you can perform a bare-metal full-system restore in just a few minutes. That is, no need to install Windows or any applications to recover your data.

Total Backup Recovery 7

AES 256 bits encryption

Total Backup Recovery offers the highest encryption standard (256 bit AES) similar to US Defense Department to prevent anyone from accessing your backup without your permission.

Universal Restore/Dissimilar Restore

Restore to original or different computer (i.e. migrate to a newly purchased computer), or even to a virtual machine without any hassle.

Recovery CD/DVD or Restore Image File Creation

After spending hours or days upgrading your system to Windows 7 you want to capture your healthy, perfect PC condition. You can make a recovery CD/DVD or an image file for it with only a few clicks.

Advanced incremental backup technology

Total Backup Recovery backs up only changes to your files (by sector) vs. other products which back up each file in its entirety. For example, it takes only a few hundred kilobits to incrementally back up your Outlook (.pst) file, whereas other products back up the entire Outlook .pst file, several Gigabits, each time.

Designed for Peace of Mind

Built with care, Total Backup Recovery offers you a total data disaster backup recovery solution with all the features you need.

Windows PE support

WinPE recovery environment provides 100% hardware support in the Recovery Manager environment. For example, RAID 0/1/5/10/JBOD, software RAID, network and iSCSI are fully supported in pre-OS Recovery Manager.

FTP Remote backup, offsite backup duplication

Automatically duplicate saved backup to remote FTP location. Ensure your files will be safe if a natural disaster should occur.

Experience NO Business operation downtime!

Creating a backup image takes very little time with the advanced snapshot feature. Performing backups will not disrupt any applications or prevent access to your database.

Unique Total File Shredder™ included - securely remove data from outside of Windows

When it does become necessary to completely remove files (such as before a PC changes hands to a new employee), any tool used in Windows still leaves traces on your drive - and tracing software can easily be hidden. FarStone's unique Total File Shredder™ is compliant to the US DoD 5220.22-M Standard and securely deletes all traces of sensitive data (such as confidential emails, legal documents, financial data, etc.) from outside of the Windows environment.

Rescue bootable media

Total Backup Recovery supports all types of bootable media, such as CD/DVD, USB flash/USB HDD, USB Key, diskless PC and PXE server. It allows you to boot into Recovery Manager when your system has failed to start.

Free Technical Support

With our helpful support staff, you'll receive free technical support on FarStone products.

Log View

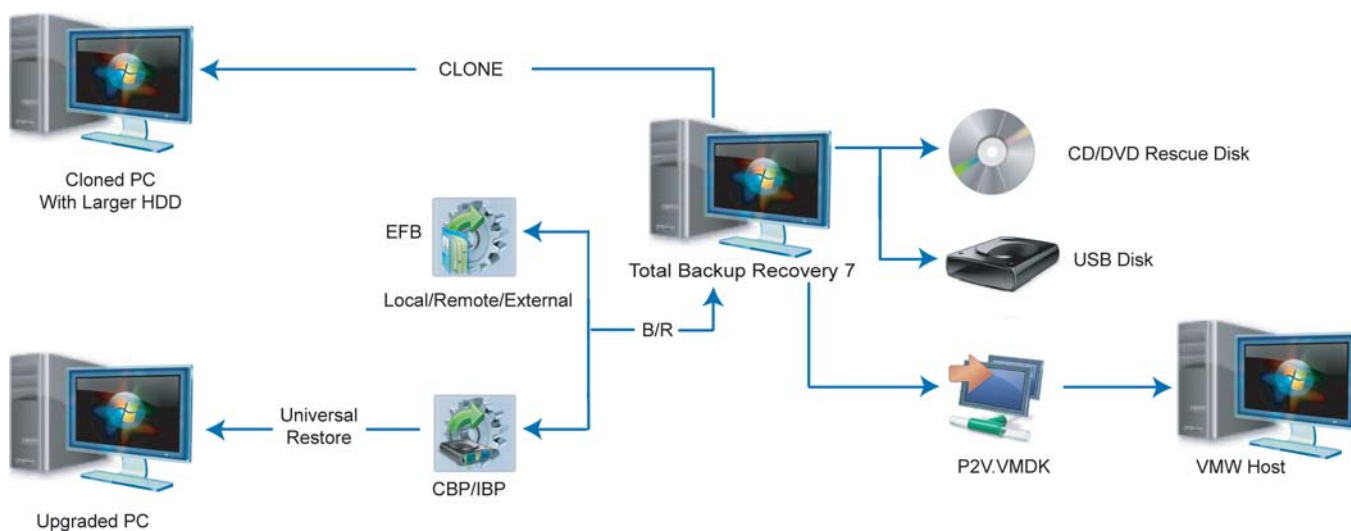

Consolidate all activities for all workstations and servers into a centralized log view.
